Fair trade by DEW

Development Wheel - DEW is a non-government voluntary development organization established in 1996 by a group of professionals and researchers to promote self-help poverty alleviation initiatives of the poorest households in Bangladesh towards sustainable improvement of their livelihood.

The mission of DEW is to contribute to socio-economic development in Bangladesh through promoting fair trade options for small producers.

Main Objectives:

- to provide a marketing channel for small producers in Bangladesh.
- to support producer groups with product development and marketing.
- to support producer groups through providing skills development training, credit, educational, climate change and its impact: mitigation strategy, health and other development support services.

Development Wheel works in Bangladesh – one of the most densely populated countries in the world. Bangladeshis are facing several challenges on everyday basis mainly connected with their geographical position such as flood, drought and cyclones. Despite of all they are trying to find their way to live with dignity and ensure the better future of their children. Half of the population is living below of the international poverty line of US\$ 1.25 per day*.

Fair trade is one of the most efficient way to fight poverty in Bangladesh. It allows hundreds of artisans to make their income and change living conditions. Moreover, it also prevents child labour. Having in mind that working child is a common view in Bangladesh, by supporting producer groups it is possible to limit the number of children that earn money to survive.

Development Wheel provides work for artisans and takes care about education and health support for the families of producers.

This catalogue aims to present one of the product lines – terracotta based products.

Terracotta Products

Terracotta Art is the earliest form of hand art in which the Bengal artists excelled.

The handcraft products in terracotta or burnt clay satisfied the creative impulse of the artists and also met the domestic and ritual needs of ordinary man.

Clay objects were either baked in the sun or burnt into terracotta for hardening and durability and were used by man in his daily life since pre-historic times.

The art was practised in Bengal from the earliest through early medieval to medieval times and even persisted on Hindu monuments till the mid-nineteenth century.

The art is noticed in all forms - small clay figurines, clay sculptures in the round, but the most notable ones are the plaques.

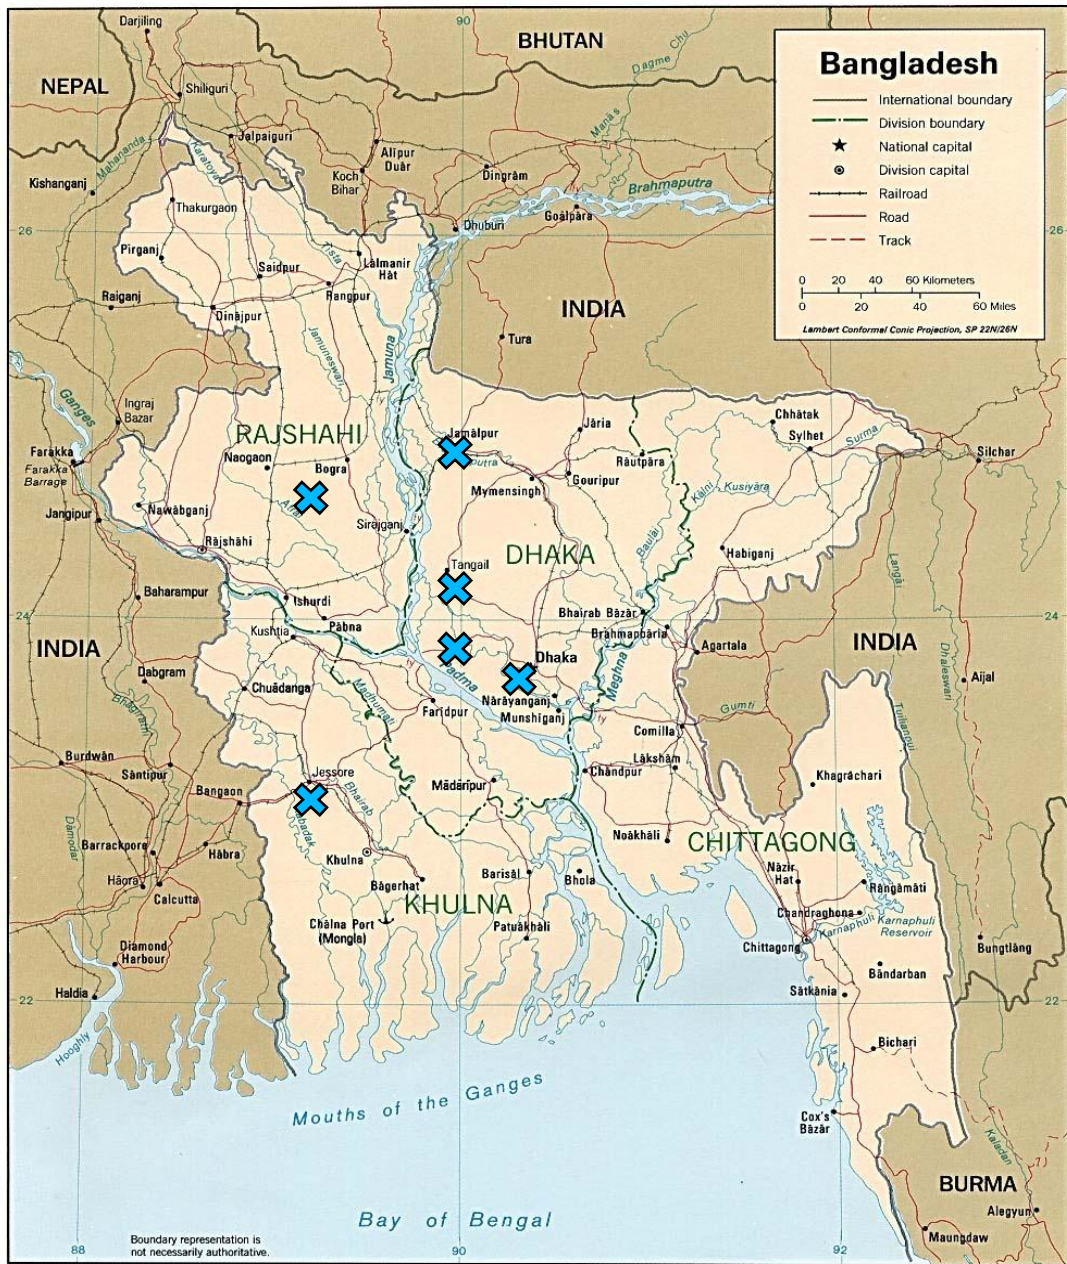

Terracotta panels and friezes, used as surface decoration on brick buildings, are Bengal's remarkable contributions to the sum-total of South Asian art.

Development Wheel respects the rich heritage and tradition connected with the terracotta and encourage local artisans to continue their tradition for the benefit of their own situation and living conditions.

Producer groups location

Developmet Wheel cooperates with producer groups in Dhaka, Bogra, Jessore, Tangail, Jamalpur, Manikgonj and plan to start working with groups in other places of the country.

At the moment there are 12 groups of artisans including 412 group members (273 are female and 139 are male) that are involved in handcraft.

Terracotta products

1. Black terracotta pot with cane design

Size: Dia-10X10cm, h-29cm,

base dia-14X14cm
